

TECHNICAL CHARACTERISTICS

Length	79 inches
Width	35 inches
Thickness	1/8 inch
Corrugation Height	1.5 inches
Corrugation Pitch	3.8 inches
Product Surface	19.2 ft ²
Weight of Panel	11.9 lbs.
Weight of Gross Surface	0.62 lbs./ft ²
Corrugations	5+4 flats
Overlap	4 inches
Net Coverage Area	16.1 ft ² ≈6.2 panels/100sqft ²
Available Colors	Red, Brown, Green

Fast and Easy DIY Installation

1 Project Estimating
ONDURA[®] can be installed over most existing roofing, on plywood/OSB, or on purlins with slopes of 3:12 or greater in areas with little to no snow. Refer to the Technical Data Sheets or call Customer Service for more information at 800-777-7663.

NUMBER OF RIDGES FOR PROJECT

$$\frac{\text{Total Ridge Length (inches)} + 4 \text{ inches}}{32.5 \text{ inches}}$$

NUMBER OF CLOSURE PACKS FOR PROJECT

$$\frac{\text{Total Eave Length (inches)}}{76 \text{ inches}}$$

2 Panel Placement
Begin by laying panels over the gutter line with a maximum of 2.5 inches overhang, lay panels in the opposite direction to the prevailing winds. The second row has to be started with a half panel cut parallel to the corrugations, to misalign side overlaps.

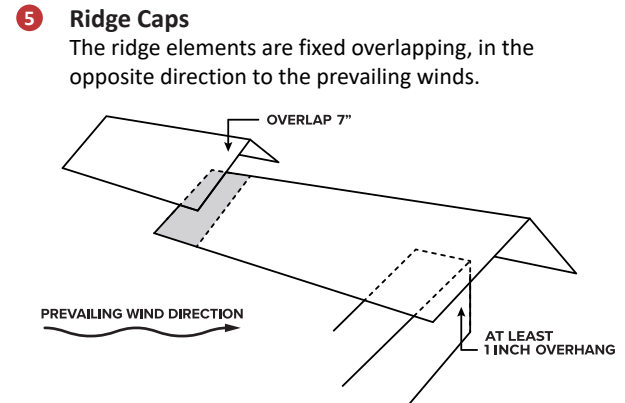

3 Fastener Pattern
Place fastener (3" Hex Head Screw) in every corrugation of starting row, except for any areas where ridges or other panels will overlap. Repeat for the second and third row of fasteners as indicated above. Conclude with the ends and top row only when overlapping panels or ridge cap is in place. Place fasteners on every corrugation.

4 Weatherproofing & Aesthetics
Finish your rake edge with an ONDURA[®] ridge to improve waterproofing and wind resistance. Using ONDURA fasteners, affix it to the sidewall and then to the top of the second corrugation. This should be repeated for all rows of fasteners.

Alternatively, you could use one corrugation strip, cut from an ONDURA[®] Edge panel and place it under the last corrugation on the rake; or secure the last corrugation directly to a raised rake edge.

Insert ridge closure strip on the panel and under the ridge cap after all panels have been placed. The center of the closure strip should be 1-inch above the lowest end of the ridge cap.

Close the area under the ridge at each end with a cap. Options are available in the instruction guide at tuftex-ondura.com

Accessories

ONDURA[®] PREMIUM RIDGE CAPS

Length	39.5 inches
Coverage Width	12.5 inches
Width at 0°	16 inches
Thickness	1/8 inch
Surface	4.4 ft ²
Weight	2.4 lbs

ONDURA[®] EDGE CLOSURE STRIPS

Length	38 inches
Height	1.3 inches

Place closure strips under the ONDURA[®] panel with the curved side up to fill the corrugations. The closure strips must be placed where the fasteners will be located so that the fasteners will securely hold the closure strips in place. Attach closure strip to the top side of the ONDURA[®] panel with rubberized elastomeric flashing cement/caulk when installing under a ridge cap. Trim closure strip as needed to accommodate panel size.

ONDURA[®] PREMIUM FASTENERS

Length	3 inches
Head Size	1/4 inch
Head Type	Hexagonal
Container Size	55 Pieces
Fasteners per 100 sqft.	126*

**Number varies by panel type, roof design, and other factors*

YOUR BACKYARD. COVERED.

Corrugated asphalt panels that cover roof decking to provide protection

*See Install Guide

Thank you for choosing ONDURA[®] Premium Series for your roofing project. ONDURA[®] should be carefully installed. Mistakes during the installation process can cause problems later and impact the warranty. Please take the time to closely follow these installation guidelines.

Lightweight. Easy. DIY.

ONDURA[®] Edge asphalt panels are lightweight and easy to install with no sharp edges. Won't rust or corrode like metal roofing and is quieter. Can be installed over solid decking or over shingles. Wind resistant to 180 MPH* No special tools required.
